

WOJCIECH DUDEK

FULLSTACK DEVELOPER HEADCHANNEL

POLAND, KATOWICE
09. 2015 to now

The position of senior full stack web application developer. I was taking part in two, bespoke projects driven in agile/scrum methodology - Pearlfinders and Opsys2. In both of them I was responsible for server side architecture design, developing client side architecture (based on AngularJS and MVC/WebAPI technologies) and writing technical documentation. I was also company software consultant during live design sessions and workshops with company customers.

FRONTEND / BACKEND DEVELOPER WISP GROUP

POLAND, GLIWICE
01. 2014 - 06. 2015

The position of web and desktop applications developer. For over a year I was working as outsourced programmer for companies mentioned below (KPMG, MARE CONECTO LTD.). I was also responsible for creating websites and online stores, its optimization and positioning in search engines (SEO). In the scope of my responsibilities there was also administration of VPSs and dedicated servers running with Windows Server 2008/2012, which were used as hosting machines for clients.

WEB DEVELOPER KPMG

NETHERLANDS, AMSTELVEEN
02. 2015 - 06. 2015
(WISP OUTSOURCE, REMOTELY)

The position of web developer in a large, international, dutch corporation - KPMG. I was responsible for expanding an existing e-commerce application - ProvIT. In addition to the implementation of additional modules of web application (using ASP.NET MVC), in the scope of my responsibilities was creating external libraries in Visual Basic.

VBA DEVELOPER OPTIMIS

SWITZERLAND, ECHANDENS
11. 2014 - 06. 2015
(REMOTELY)

The position of VBA programmer, during development of two large manager applications, in cooperation with swiss company - Optimis. Swiss counterparty located in Echandens, was a company which create software for comprehensive management of human capital. I was responsible for improvement of application performance and implementation of its additional modules.

WEB DEVELOPER MARE CONECTO LTD.

CROATIA, ZAGREB
01. 2014 - 12. 2014
(WISP OUTSOURCE, REMOTELY)

The position of web developer and tech-leader of the polish developers team, which was cooperating with the Mare Conecto Ltd counterparty, during realization of the BoatBooker.net startup - an innovative solution designed to support the process of yachts chartering. In the project, I had two roles - first was a tech-leader and it was about coordinating and overseeing work progress of polish team. The second role was regular web developer using ASP.NET MVC and AngularJS.

.NET / EMBEDDED DEVELOPER TECH DESIGN

POLAND, DĄBROWA GÓRNICZA
01. 2013 - 06. 2013

The position of junior backend developer and embedded devices programmer for dedicated devices in the automotive industry. In scope of my responsibilities there were creating source code for microprocessor units in C/C++ and creating dedicated desktop applications in C# (.NET WinForms).
